

Damian Tziamtzis

PRODUCT ENGINEER

✉ damian.tziamtzis@gmail.com | 🏠 damitzi.com | 📱 damtzi

Summary

Product engineer with deep React, Next.js, and TypeScript experience across travel, subscriptions, privacy tech, and AI products. I've led frontend work from early product shaping through production delivery, including booking funnels, paywalls, developer tools, CMS platforms, and mobile experiences. I care about clear UX, reliable systems, and shipping work that moves the product.

Experience

Product Engineer

[Remote](#)

CAMPY

Feb 2026 - Present

- Built Campy Plus paywalls, upsells, promo flows, and purchaserecovery paths for a camping app with 500,000+ EU users, using **React Native**, **Expo**, **TypeScript**, **Adapty**, **GraphQL**, and **Firebase**;
- owned the **Adapty** migration for Campy Plus, replacing legacy IAP flows with hosted paywalls, entitlement checks, and offline fallbacks - eliminating a recurring class of subscription-access bugs across iOS and Android;
- built purchase-recovery and promo redemption flows serving a 500,000+ user base, closing gaps in the legacy entitlement system;
- fixed ATT-aware **Singular** and **Meta SDK** initialization, deep-link routing, and SKAN config, resolving attribution gaps that had been silently under-reporting install sources.

Frontend Engineer

[Remote](#)

OKE

Jan 2026 - Present

- Developed booking, search, and content experiences for Prijsvrij, a Dutch online travel retailer, using **Next.js**, **React**, **TypeScript**, **Storyblok**, **tRPC**, **GraphQL**, **SCSS**, and **Vercel**;
- reduced CMS/API overfetching and trimmed SSR payloads on high-traffic booking pages, measurably improving load times and reducing time-to-interactive;
- refined the package-holiday booking flow (room selection, flight alternatives, search behavior), removing friction points identified through UX review;
- hardened schema and fallback states in D-Connect flight/price data, eliminating a recurring class of pricing-mismatch bugs previously escalated by support;
- improved travel result accuracy by adding flight timing, stopover details, and recommendation sorting, closing gaps between displayed and actual pricing.

Frontend Engineer

[London, United Kingdom](#)

SECRETARIUM

Sep 2020 - Nov 2025

- Led development as solo engineer on the Klave AI chat platform, leveraging confidential computing to deliver secure, privacy preserving conversational AI experiences, using **React**, **Vite**, **shadcn/ui**, **Tailwind CSS**, **TanStack Router**, and a **Fastify Node.js** backend;
- built and evolved the Klave CLI tool initially with **Node.js** and later rewritten in **Rust**, enabling scaffolding of Klave apps and seamless command-line interaction with deployed applications;
- served as main developer and technical lead for the SoftMetal trading platform, developed with **React**, **Vite**, **React Router**, **Tailwind CSS**, and **Redux** to deliver a performant and intuitive UI for ferroalloy trading;
- developed and maintained Moai app as a Progressive Web App (PWA) using **Expo**, **React Native**, and modern frontend best practices focused on privacy and seamless user experience;
- contributed to the Klave Platform frontend with **React**, **React Router**, **Tailwind CSS**, integrated with backend services using **MongoDB** and **Prisma**, ensuring secure and privacy focused application workflows;
- led development on marketing and corporate websites for MoaiApp, SoftMetal, Klave, Danie.tech, Amlytic.com, and STTS.io using **Next.js**, **TypeScript**, **Tailwind CSS**, and **Framer Motion** for smooth animations and responsive design;
- built docs.klave.com as the primary developer resource for Klave, covering setup, CLI usage, and API reference for external integrators;
- integrated and maintained **Payload CMS** for klave.com, softmetal.ch, and secretarium.com to streamline content management and improve site maintainability;
- worked closely with backend engineers and product teams to deliver privacy first and production ready web applications aligned with company goals and user needs.

Frontend Engineer

[Lancaster, United Kingdom](#)

IT PARTNERING & INNOVATION AT LANCASTER UNIVERSITY

Jan 2020 - July 2020

- Engineered **React** based apps distributed an estimated 15,000 users including session booking and time management tools;
- carried out design, development, testing and support of software;
- worked on a parking validation application for campus security.

Education

Lancaster University

Lancaster, United Kingdom

BSc HONS COMPUTER SCIENCE

2017 - 2020

- Advanced Programming – principles of OOP, recursive programming, functional programming
- Operating Systems – file systems, semaphores, concurrency, race conditions
- Software Design – object-oriented design, use cases, statecharts
- Human-Computer Interaction – measuring UX, design principles
- Internet Applications Engineering - responsive web design & web development principles

Extracurricular Activity

Fundacja Kompetencji Cyfrowych

Remote, Poland

PRODUCT ENGINEER

Jan 2026 - Present

- Built core marketplace flows for wolontariatonline.org: offer browsing, offer details, foundation admin, offer wizard, and authenticated user flows;
- integrated **Payload CMS** into a **Next.js** app, adding editorial page models, media handling, migrations, seeding, and publish/revalidation pipeline;
- improved platform UX and maintainability by extracting reusable UI components, adding **Storybook** coverage, aligning pages to design specs, and improving responsive layouts;
- added infrastructure polish: **pnpm** migration, **ESLint**/**Prettier**/**commitlint**/**Husky** setup, CI updates, **Azure Blob** survey uploads, and deployment config updates.

SoftMetal

Remote, Poland

FRONTEND ENGINEER

Dec 2025 - Present

- Led frontend development of the SoftMetal ferroalloy trading platform using **React**, **TypeScript**, **Vite**, **React Router**, **Redux**, **Tailwind CSS**, **Cypress**, and Secretarium APIs;
- built core trading workflows including markets, order books, buy/sell flows, portfolio views, asset tokenization/detokenization, transfers, redemption, invoices, communications, and warehouse operations;
- retained after Secretarium's closure to provide ongoing maintenance, bug fixes, and occasional product enhancements.

Skills & Certificates

Languages	JavaScript, TypeScript (advanced), Python, Java (intermediate), Rust (basic)
Frameworks	React, Next.js (advanced), Astro, Expo (intermediate), Svelte, SvelteKit (basic)
UI & Styling	Tailwind CSS, CSS3, HTML5, shadcn/ui, Motion, ANTD
Libraries & Packages	React Router, TanStack Router, Redux, Zustand, Jotai
Mobile Development	React Native, Expo (PWA & cross-platform)
Version Control	GitHub, GitLab
Tooling	Docker, NX monorepos, GitHub Actions CI/CD pipelines
AI Tools	Claude Code, Codex, Opencode, Cursor, Pi
CMS	Payload, Strapi, Storyblok
